### PROFILE

**Senior Java Developer** with a strong track record in delivering scalable, maintainable, and high-performance backend solutions for fintech, corporate, and enterprise environments. I specialize in **Java** and **Spring Boot development**, microservices architecture with Go, and cloud-based deployment on Azure. Alongside my technical expertise, I actively mentor and coach aspiring developers, fostering best practices in software design, coding quality, and problem-solving. My experience spans the full software lifecycle, from requirement analysis and design to deployment and ongoing system optimization, ensuring reliable and efficient solutions that support business growth.

### WORK EXPERIENCE

#### Java Software Engineer

*04/2024 – present*

*HYPE | Turin, Italy*

I actively contribute to the development and maintenance of backend applications for HYPE, an innovative fintech platform providing digital banking services.

#### Responsibilities:

- Implement new backend functionalities and participate in the design and development of new features.
- Develop robust and scalable applications using Java.
- Build high-performance microservices with Golang (Go).
- Deploy, monitor, and manage applications on Azure.
- Containerize applications with Docker for consistent and efficient deployment.
- Utilize Spring Boot for rapid production-ready application development.

Successfully contributed to backend improvements that enhanced system performance, scalability, and reliability, supporting HYPE's growing fintech services.

**Tools:** Java 21, Golang (Go), Spring Boot, Azure, Docker

#### Java Software Engineer

*01/2022 – 03/2023*

*Spindox SPA | Turin, Italy*

I contributed to the development and implementation of Warehouse Management Systems for Swisslog, ensuring efficient and reliable operations.

#### Responsibilities:

- Developed and configured Warehouse Management Systems (WMS) using Swisslog's proprietary software, SynQ.
- Collaborated with client teams to translate business and operational requirements into software solutions.
- Performed testing, debugging, and troubleshooting to ensure optimal system performance.
- Supported deployment and integration activities for multiple warehouse environments.

Successfully implemented WMS solutions that improved warehouse efficiency and reliability for Swisslog clients.

**Tools:** SynQ (*Swisslog proprietary WMS software*), Java

#### Java Software Engineer

*08/2020 – 12/2021*

*inRebus | Turin, Italy*

I developed backend solutions for multiple corporate clients, focusing on reliable, maintainable, and scalable software aligned with business requirements.

#### Responsibilities:

- Implemented projects for clients including IVECO, Intesa San Paolo, and CSI Piemonte.
- Developed backend services and applications using Java EE and the Spring Framework.
- Collaborated with client teams to ensure solutions met functional and technical specifications.

- Participated in code reviews, debugging, and system testing to maintain high-quality standards.
- Delivered reliable, maintainable software solutions that improved operational efficiency for key clients across different sectors.

**Tools:** Java EE, Spring Framework

**Full stack Developer**  
**Betacom SRL | Turin, Italy**

**11/2018 – 08/2020**

I developed backend solutions and integrations for corporate clients, focusing on improving system functionality and data access efficiency.

**Responsibilities:**

- Implemented multiple projects for Banca Intesa San Paolo, developing backend components using the client's proprietary BEAR Framework based on Spring Boot.
- Designed and developed RESTful APIs to retrieve and manage data from Oracle databases.
- Contributed to front-end development using Angular 6 to support interactive user interfaces.
- Collaborated with cross-functional teams to ensure alignment with business requirements and technical specifications.

Delivered robust, scalable backend solutions that improved data retrieval efficiency and system reliability for critical banking operations.

**Tools:** Java EE, Spring Framework, Angular 6, Oracle Database, BEAR Framework

## OTHER ACTIVITIES

**Mentor & Coding Coach**  
**Start2Impact srl | Full-remote**

**03/2024 – present**

- Review and evaluate student projects in HTML/CSS, Java, PHP & MySQL, and Angular.
- Provide detailed feedback on code quality, functionality, and best practices.
- Support learners in improving their technical skills and understanding of software development concepts.
- Encourage practical problem-solving and continuous learning.

## EDUCATION

**Bachelor degree in Computer Science | Università degli Studi di Torino | Torino**

**09/2020 – present**

Full-time study alongside professional work (40h/week), focused on complex IT systems and Web application development. Coursework covered the full Web ecosystem, including JavaScript, HTML5, CSS3, Bootstrap, Vue.js, Tailwind CSS, XML, JSON, Flutter, PHP, Java EE (Servlets), REST & RESTful APIs, JDBC, and JSP. The program aims to prepare graduates capable of designing, developing, and managing scalable, modern software solutions.

## COURSES

**Frontend Development on Angular | Fortechance**

**09/2022 – 11/2022**

*Practical training on Angular for building dynamic and responsive web applications, focusing on components, modules, and modern frontend best practices.*

**Frontend Development on JavaScript & jQuery | Fortechance**

**07/2021 – 11/2021**

*Advanced JavaScript and jQuery techniques for interactive and dynamic web development, DOM manipulation, and API integration.*

**Java Development | Progetto Marconi**

**02/2018 – 04/2018**

*Intensive course on Java programming, object-oriented design, and server-side application development, including database management and enterprise framework integration.*

**English Language | Level B2 | Istituto Gamma**

*Intermediate/advanced proficiency in English, with the ability to communicate effectively in technical and professional IT contexts.*

## LANGUAGES

**Italian** (Native), **English** (Professional proficiency), **Spanish** (elementary)

## SKILLS

**Java 21 version, Spring Boot, Spring Framework, Node.js, Git, JavaScript, Angular, SQL**
